Team BirdFeedr Wiki

Welcome to the Team BirdFeedr Wiki. Here, you can find information regarding all of our latest projects.

What is Team BirdFeedr?

Team BirdFeedr is a software development team that is developing extensions for the BlueJ IDE.

Read more about our vision.

Current Status

BirdFeedr is currently working on an extension tentatively called BlueJ-Codingbat that will allow users to do programming exercises and verify them.

We are working hard on creating the first iteration of our product, which will be able to load an exercises and allow users to test an exercise's correctness by right clicking its class in BlueJ.

Extensions

Head to the [BirdFeedr Product](#) Page for more information on completed products, including how to download our extensions.

Policies

Our policies help us know what to expect from each other.
