Greetings!

We are sending this email to let you know what we have accomplished and what we plan to accomplish. We
had a team meeting today and discussed Project Git and Project Chirp. Based on what we discussed. Project
Git has met and surpassed its goals for this week. More specifically, we have implemented the Commit and Init
features. We plan to give more details on Project Git and a demo of our work on Monday. By Wednesday, we
plan to finish documentation so that we can close the project by the end of the week. Our goal will be to leave
this project in a ready state for future teams to take over.

Project Chirp has closed their project. Team members are focusing on upcoming goals such a delivering a
presentation and researching project ideas. They plan to gather feedback from the class on presentation ideas
in class this week.

As Team Birdfeedr, we discussed our plans to have the entire group working on one project for the rest of the
semester. We would like to commit to a final project by the end of the week. Our goal is to discuss our project
ideas on Monday and to make a final decision on Wednesday. We would also like to have a presentation next
week--that is--the week of February 15 - 21.

Please reply with any comments and questions.

Best Regards,

Team Birdfeedr
